

VOCATIONAL SERVICES PLATFORM

v0.dev Prompt Pack

Admin Frontend — All 48 Pages

Copy-paste prompts to generate production-ready React + Tailwind + shadcn/ui screens

Total Pages	48 admin pages across 14 sections
Output Stack	React · TypeScript · Tailwind CSS · shadcn/ui
Design Style	Dark sidebar, clean content area, professional admin aesthetic
Primary Colour	#1D4ED8 (blue) with #0F172A sidebar
How To Use	1. Paste Global Design System prompt FIRST. 2. Paste each page prompt. 3. Iterate.
v0.dev URL	v0.dev

How to Use This Prompt Pack

Follow these steps for every page. Do not skip Step 1 — the design system prompt establishes the visual language that makes all 48 pages consistent.

Step-by-Step Process

Step 1 — Go to v0.dev and start a new project.

- Paste the Global Design System prompt (next page) as your very first message
- This establishes colours, sidebar, typography, badge styles, and component patterns
- v0 will generate the shell layout — approve it before moving to any page

Step 2 — For each page, open a new v0 chat or continue the same conversation.

- Paste the page prompt exactly as written
- v0 will generate a complete React component
- Use the follow-up refinements listed under each prompt to iterate

Step 3 — Export and integrate.

- Click "Open in StackBlitz" or copy the code from v0
- Drop into `src/app/admin/[page-name]/page.tsx` in your Next.js project
- Replace mock data with real API calls using the endpoint listed under each prompt

v0 Prompting Tips

 **Be specific** — v0 performs best when you name specific UI components (DataTable, Badge, Sheet, Dialog) and describe data shapes explicitly.

 **Iterate in stages** — Generate the layout first, then ask for "Add a filter bar at the top" or "Make the status column use coloured badges" in follow-up messages.

 **Reuse context** — If you're in the same v0 conversation, say "Using the same design system as before, generate..." and it will maintain visual consistency.

 **shadcn/ui is pre-loaded in v0** — Do not install it manually. v0 uses shadcn/ui components natively. Reference them by name: Card, Badge, Button, DataTable, Sheet, Dialog, Tabs, Select, etc.

Consistent Across All Pages

Element	Specification
Sidebar width	240px, background #0F172A, text #94A3B8, active item #1D4ED8
Top bar height	64px, white background, border-bottom, search + notifications + avatar
Content area background	#F8FAFC (slate-50)
Primary action button	Blue #1D4ED8, white text, rounded-md
Danger action button	Red #DC2626, white text
Status badge — Active/Approved	Green background #D1FAE5, text #065F46

Element	Specification
Status badge — Suspended/Rejected	Red background #FEE2E2, text #991B1B
Status badge — Pending/Submitted	Amber background #FEF3C7, text #92400E
Status badge — Draft	Gray background #F3F4F6, text #374151
Data table row hover	#F1F5F9
Card border radius	rounded-lg with border border-slate-200
Font	Inter (system-ui fallback)

STEP 1 — PASTE FIRST

Global Design System Prompt

Global Design System

 **PASTE THIS FIRST** — This prompt must be your very first message in every new v0 session. It establishes the admin shell, sidebar, and all component patterns that every page depends on.

PAGE SYSTEM Global Design System · Paste as first message in every v0 session

Create a production-ready admin dashboard shell for a vocational services marketplace platform called "VSP Admin". Use the following exact specification:

TECH STACK: React + TypeScript + Tailwind CSS + shadcn/ui. Next.js App Router.

LAYOUT:

- Fixed sidebar: 240px wide, full height, background #0F172A (slate-950)
- Top bar: 64px tall, white bg, border-bottom border-slate-200, sticky
- Content area: flex-1, background #F8FAFC, overflow-y-auto, p-6

SIDEBAR DESIGN:

- Logo area at top: "VSP" text logo in blue #1D4ED8 + "Admin" in white, 20px bold
- Nav sections with uppercase 11px labels in #475569: OVERVIEW, USERS, WORKERS, MARKETPLACE, MODERATION, SUPPORT, ANALYTICS, CONFIGURATION, SYSTEM
- Nav items: text-sm text-slate-400, hover:bg-slate-800 hover:text-white
- Active item: bg-blue-600 text-white rounded-md
- Icons: use lucide-react icons (LayoutDashboard, Users, HardHat, ShoppingBag, Shield, HeadphonesIcon, BarChart3, Settings, Activity)
- Nav items: Dashboard, Users List, Workers List, Verification Queue, Featured Workers, Service Requests, Bookings, Reports Queue, Moderation Cases, Fraud Signals, Support Tickets, Analytics Overview, Search Analytics, Engagement Analytics, Marketplace Analytics, Configurations, Feature Flags, Cities, Audit Logs, System Health
- Count badges on: Verification Queue (amber), Reports Queue (red), Support Tickets (blue)
- Bottom: Admin avatar + name + role badge + logout icon

TOP BAR:

- Left: Page title (bold, 18px) + breadcrumb in slate-400
- Center: Search input with Cmd+K shortcut hint, slate border, rounded-lg
- Right: Date range picker button, bell icon with unread badge (red dot), MFA status icon (green lock if verified, amber warning if not), admin avatar with dropdown (My Profile, MFA Setup, Logout)

DESIGN TOKENS (use these exactly):

- Primary: #1D4ED8 (blue-700)
- Danger: #DC2626 (red-600)
- Success bg: #D1FAE5, text: #065F46
- Warning bg: #FEF3C7, text: #92400E
- Error bg: #FEE2E2, text: #991B1B
- Pending bg: #F3F4F6, text: #374151
- Info bg: #DBEAFE, text: #1E40AF

SHARED COMPONENTS to define:

1. StatusBadge: variant prop (active|suspended|deleted|approved|rejected|submitted|under_review|pending|completed|cancelled|open|expired)
2. DataTable: sortable columns, row hover #F1F5F9, checkbox column, action column with dropdown (View, Edit, Suspend etc)
3. PageHeader: title + subtitle + primary action button slot
4. StatCard: icon + label + value + trend indicator (up/down %)
5. FilterBar: search input + multiple Select filters + date range + reset button

Show the shell with the Dashboard page active. Dashboard content:

- Row of 5 StatCards: Total Users, Active Workers, Open Bookings, Open Moderation Cases, Unresolved Tickets
- Line chart for New Signups (last 7 days)
- Bar chart for Bookings (last 7 days)
- 2-column bottom: Recent Verification Requests table + System Status panel

Make it visually polished, professional, and ready for production.
Use realistic placeholder data.

✓ **After v0 generates this** — Review the sidebar, top bar, StatCards, and table styles. Approve the design before moving to individual page prompts. Request any colour or spacing tweaks here.

SECTION 1

Authentication — Pages 1–3

PAGE 01 Admin Login · Authentication

Generate an Admin Login page for VSP Admin using the established design system.

LAYOUT: Centered card on a dark gradient background (#0F172A to #1E293B).

Left side (60%): large illustration area – show abstract network/platform graphic with blue accent nodes. Right side (40%): login form card.

FORM CARD:

- VSP Admin logo at top with blue shield icon
- Heading: "Welcome back" (24px bold) + "Sign in to your admin account" (slate-500)
- Email field with Mail icon prefix
- Password field with Lock icon prefix + show/hide toggle
- "Remember this device" checkbox
- Primary blue "Sign In" button (full width)
- "Forgot password?" link (right-aligned, blue)
- Divider + small text: "Protected admin access only"

ERROR STATES (show as example):

- Invalid credentials: red banner under form "Invalid email or password"
- Account suspended: amber banner "Your account has been suspended"
- Session expired: info banner "Your session expired. Please sign in again."

After successful login show MFA challenge modal:

- "Two-factor verification required"
- 6 separate digit input boxes (like OTP boxes)
- "Use backup code" link below
- Verify button + Cancel

Make it feel premium and secure. Dark, professional aesthetic.

 **API** — POST /api/v1/auth/login → POST /api/v1/auth/mfa/challenge

PAGE 02 Password Reset · Authentication

Generate a Password Reset flow for VSP Admin. Same dark gradient background as login.

Show 3 steps as a stepper at the top of the card:

Step 1 – Enter email → Step 2 – Enter OTP code → Step 3 – New password

STEP 1: Email input with "Send reset code" button. Show success state: green check icon + "Reset code sent to a***@domain.com"

STEP 2: 6-digit OTP input boxes + "Resend code (2:45)" countdown timer. Show "Check your email or phone" helper text.

STEP 3: New password field with strength indicator bar (weak/fair/strong/very strong) + Confirm password field. Requirements checklist: 8+ chars ✓, uppercase ✓, digit ✓. "Reset password" button. On success show green confirmation card.

All steps on the same card – animate step transitions.

[🔗 API](#) — [POST /api/v1/auth/request-password-reset](#) → [POST /api/v1/auth/reset-password](#)**PAGE 03 Session Expired** · Authentication

Generate a Session Expired / Access Denied page for VSP Admin.

Show 2 variants:

VARIANT A — Session Expired:

Centered on dark background. Clock icon (amber, 64px). "Session Expired" heading.

"Your session has timed out for security. Please sign in again."

Blue "Sign in again" button. Small text: "You will be returned to your last page."

VARIANT B — Access Denied:

Red shield-off icon. "Access Denied" heading.

"You don't have permission to access this page."

Show user's current role badge (e.g. "MODERATOR").

Show what permission is required: "Requires: USER_SUSPEND permission".

Two buttons: "Go to Dashboard" (primary) + "Request Access" (outline).

Both variants should feel clean and non-alarming.

SECTION 2

Dashboard & Account — Pages 4–6

PAGE 04 Overview Dashboard · Dashboard

Generate the main Analytics Overview Dashboard for VSP Admin.

TOP ROW — 5 StatCards in a grid:

- Total Users: 52,847 | +12% this week | Users icon (blue)
- Active Workers: 4,231 | +8% | HardHat icon (green)
- Open Bookings: 1,847 | +23% | Calendar icon (amber)
- Moderation Cases: 34 | -5% (positive) | Shield icon (purple)
- Unresolved Tickets: 18 | +2 today | HeadphonesIcon (slate)

CHARTS ROW (2 columns):

- Left: "New Registrations" line chart — 7-day trend, blue line, area fill
Data: [Mon 145, Tue 132, Wed 178, Thu 165, Fri 201, Sat 88, Sun 72]
- Right: "Bookings" bar chart — 7-day, split bars (completed=green, cancelled=red)

BOTTOM ROW (2 columns):

- Left: "Recent Verification Requests" table
Columns: Worker name+avatar, Trade, Submitted, Status badge, Quick actions
Show 5 rows with SUBMITTED/UNDER_REVIEW/APPROVED statuses
"View all" link to verification queue
- Right: "System Status" card
Items with green/amber/red dot indicators:
Database: Operational (4ms) ✓
Redis: Operational (1ms) ✓
Typesense: Operational (8ms) ✓
Notifications Queue: 12 pending ✓
Search Queue: 0 pending ✓
Last job run: 2 min ago ✓

TOP BAR shows "Overview" as active nav item.

Add date range selector: "Last 7 days ▼" button top-right of page.

Use recharts for charts with smooth animations.

 **API** — GET /api/v1/admin/analytics/overview GET /api/v1/admin/system/health

PAGE 05 Notifications Center · Account

Generate a Notifications Center page for VSP Admin.

LAYOUT: Full page with left filter panel (240px) + right notification list.

LEFT FILTER PANEL:

- "All Notifications" count badge
- Filter by type: All | Verification | Moderation | Support | System | Bookings
- "Mark all as read" button
- "Unread only" toggle switch

NOTIFICATION LIST (right):

Each notification is a card row with:

- Left: Coloured icon circle (blue=info, amber=warning, red=alert, green=success)
- Content: Bold title + body text snippet + relative time ("2 min ago")
- Right: Unread blue dot (if unread) + entity link chip

- Hover: light blue background, cursor pointer
- Click: marks as read, navigates to entity

Show 12 example notifications:

- [AMBER] "New verification request" — Bob Williams submitted documents — 2m ago
- [RED] "High-severity report" — Post flagged by 5 users — 8m ago
- [GREEN] "Booking completed" — Job #4521 completed successfully — 15m ago
- [BLUE] "Support ticket assigned" — Ticket #892 assigned to you — 1h ago
- [RED] "Fraud signal triggered" — Score 78, user @alice_t — 2h ago
- (6 more varied examples)

Unread notifications have bold title + left blue border accent.

Read notifications are slightly dimmed.

Infinite scroll with "Load more" at bottom.

 **API** — GET /api/v1/notifications POST /api/v1/notifications/read-all

PAGE 06 My Profile · Account

Generate a My Profile / Account Settings page for VSP Admin.

LAYOUT: Two column. Left (1/3): Profile card. Right (2/3): Settings tabs.

LEFT PROFILE CARD:

- Large avatar (96px) with edit overlay on hover
- Display name: "David Mensah"
- Role badge: "ADMIN" in blue pill
- Email + phone (masked: d***@admin.com)
- "Last login: 2 hours ago · Accra, Ghana"
- MFA status row: green shield icon "MFA Active (TOTP)" OR amber warning "MFA Not Configured — Setup Required"
- "Setup MFA" button if not configured

RIGHT SETTINGS TABS: Profile | Security | Sessions

PROFILE TAB:

- First name / Last name fields
- Display name field
- "Save changes" button

SECURITY TAB:

- Change password section (current + new + confirm)
- MFA section: current method + "Change method" / "Disable MFA" button
- Backup codes: "8 backup codes remaining" + "Regenerate codes" button

SESSIONS TAB:

- Table: Device | IP | Location | Last Active | Action
- Current session highlighted with green "Current" badge
- Other sessions have "Revoke" button
- "Revoke all other sessions" danger button at bottom

 **API** — GET/PATCH /api/v1/users/me GET /api/v1/auth/me

SECTION 3

User Management — Pages 7–10

PAGE 07 Users List · User Management

Generate the Users List admin page for VSP Admin.

PAGE HEADER: "Users" title + "52,847 total" subtitle + "Export CSV" button.

FILTER BAR (full width):

- Search: "Search by name, email, phone..."
- Status select: All / Active / Suspended / Deleted
- City select: All Cities / Accra / Lagos / Nairobi
- Role select: All / Admins Only / Workers / Customers
- Reset filters link

DATA TABLE columns:

- Checkbox | Avatar+Name+Email | Phone | City | Status badge | Role badge | Last Login | Registered | Actions dropdown

STATUS BADGES: Active=green, Suspended=red/amber, Deleted=gray

ROLE BADGE: Small "ADMIN"/"MODERATOR" pill – only shown if admin role assigned

ACTIONS dropdown per row: View Profile | Suspend | Reactivate | View Bookings

Show 10 rows with realistic data. Mix of statuses and cities.

BOTTOM: Pagination – "Showing 1-20 of 52,847" + prev/next + page size selector.

Add a "bulk actions" bar that appears when rows are selected:

"3 selected · Export · Suspend Selected · Clear selection"

 **API** — GET /api/v1/admin/users?status=&q=&cityId=&page=&limit=

PAGE 08 User Detail · User Management

Generate the User Detail page for VSP Admin.

TOP SECTION: Hero card spanning full width.

- Left: Large avatar (80px) + name (24px bold) + email + phone
- Center: Status badge + registered date + last login + city
- Right: Action buttons – "Suspend User" (red outline) | "View as Customer" (ghost)

TABS below hero: Profile | Bookings | Service Requests | Notifications | Sessions | Push Devices

PROFILE TAB:

- Two column grid: personal info on left, account info on right
- Show: full name, email, phone, city, bio, coordinates
- Show: user ID, created date, email verified ✓/x, phone verified ✓/x

BOOKINGS TAB:

- Mini table: Booking ID | Worker | Trade | Date | Status | Amount
- Show 5 rows. Link to full booking detail.

SERVICE REQUESTS TAB:

- Mini table: Request title | Trade | Status | Date | Assignments

SESSIONS TAB:

- Table: Device type | IP | Last active | Created | Revoke button
 - Current session green highlighted

PUSH DEVICES TAB:

- Table: Platform badge (iOS/Android/Web) | Token (masked) | Last seen | Remove

Show realistic data. User: Alice Johnson, Accra.

 **API** — GET /api/v1/admin/users/:userId

PAGE 09 Suspend User · User Management

Generate a Suspend User confirmation modal/dialog for VSP Admin.

This appears as a Dialog overlay on top of the User Detail or Users List page.

DIALOG CONTENT:

- Red header: AlertTriangle icon + "Suspend User Account"
- User summary card inside dialog: avatar + name + email + current status badge
- Impact warning box (amber background):
 - "⚠ This action will immediately:"
 - End their active session (1 active session)
 - Block all future logins
 - Cancel 2 pending booking requests
 - Notify the user by email
- Reason textarea (required, min 5 chars):
 - Label: "Reason for suspension *"
 - Placeholder: "Describe the reason for this suspension..."
- MFA verification field (if mfa_verified=false):
 - "Enter your 6-digit MFA code to confirm"
 - 6 OTP input boxes
- Footer: "Cancel" (outline) + "Suspend Account" (red, disabled until reason filled)

Show the dialog in open state over a blurred background.

 **API** — POST /api/v1/admin/users/:userId/suspend

PAGE 10 Reactivate User · User Management

Generate a Reactivate User confirmation modal for VSP Admin.

Simpler than the suspend modal – no MFA required.

DIALOG:

- Green header: CheckCircle icon + "Reactivate User Account"
- User summary card: avatar + name + email + "Suspended" red badge
- Info box (blue): "This will restore full platform access for this user."
- Notes textarea (optional): "Internal notes (optional)"
- Show suspension reason that was given originally (read-only)
- Footer: "Cancel" + "Reactivate Account" (green button)

```
Also show the success toast that appears after reactivation:  
"✓ Alice Johnson has been reactivated" – green toast, top-right, auto-dismiss.
```

 **API** — POST /api/v1/admin/users/:userId/reactivate

SECTION 4

Worker Management — Pages 11–15

PAGE 11 Workers List · Worker Management

Generate the Workers List admin page for VSP Admin.

PAGE HEADER: "Workers" + "4,231 active workers" + "Export" button.

FILTER BAR:

- Search workers by name or trade
- Verification Status: All / Draft / Submitted / Under Review / Approved / Rejected
- Trade: All / Electrician / Plumber / Carpenter / etc.
- City: All / Accra / Lagos / Nairobi
- Featured toggle: "Featured only" switch

DATA TABLE columns:

- Avatar+Name | Trade badges (up to 2 then +N more) | City | Verification badge | Rating (star icon + number) | Jobs Completed | Response Rate | Featured star | Joined date | Actions

VERIFICATION BADGES: Approved=green, Submitted=amber, Under Review=blue, Rejected=red
FEATURED: gold star icon when isFeatured=true

QUICK ACTION in row: For "Submitted" status show inline "Review →" link in amber.

ACTIONS dropdown: View Profile | Verify | Reject | View Bookings | Suspend

Show 8 realistic worker rows. Mix of trades and statuses.
Rating shown as "4.8 ★" with gold colour.

SUBMITTED count badge on page title: "Verification Queue (12)"

 **API** — GET /api/v1/admin/workers?verificationStatus=&q=&page=&limit=

PAGE 12 Worker Detail · Worker Management

Generate the Worker Detail admin page for VSP Admin.

HERO CARD:

- Left: Avatar (80px) + name + headline + trade badges
- Center stats row: ★ 4.8 Rating | 47 Jobs | 94% Response | Since Jan 2024
- Right: Verification status badge (large) + action buttons: "Verify" (green) | "Reject" (red outline) | "Suspend" (gray outline)
- Featured toggle switch: "Featured Worker" with gold star

TABS: Profile | Services | Service Areas | Portfolio | Certifications | Verification | Availability | Bookings | Reviews | Subscription

PROFILE TAB: Bio, experience years, service radius, location coordinates.

SERVICES TAB: Table of services – title, description, price, enabled toggle.

PORTFOLIO TAB: Image grid (3 columns) – portfolio images with title/caption overlay.

CERTIFICATIONS TAB: List — cert title, issuer, issued/expires dates, status badge, "View document" button (opens in modal/viewer).

AVAILABILITY TAB: Weekly grid — Mon to Sun, show available time slots in blue.

REVIEWS TAB: List of reviews — reviewer avatar, rating stars, body, date.
Average score shown at top with dimension breakdown (quality/communication/etc).

SUBSCRIPTION TAB: Current subscription card — Active badge, starts/ends dates, payment ref, extend/cancel buttons. Invoice history table below.

 **API** — GET /api/v1/admin/workers/:workerId GET /api/v1/admin/workers/:workerId/subscription

PAGE 13 Verification Queue · Worker Management

Generate the Worker Verification Queue page for VSP Admin.

PAGE HEADER: "Verification Queue" + amber badge "12 pending" + "Oldest first" sort.

LAYOUT: Card grid (2 columns) — each card is a verification request.

VERIFICATION REQUEST CARD:

- Top: Worker avatar + name + trade badge + "Submitted 3 hours ago"
- Stats row: Experience years | Service area | Portfolio items | Documents uploaded
- Document indicator: "3 documents uploaded" with paperclip icon
- Bio snippet (2 lines, truncated)
- Bottom actions: "Review Now →" (blue button) + "Quick Approve ✓" (green, small)
- Card left border: amber accent for new submissions

Show 6 cards with varied data. Include:

- 2 cards submitted today (amber border, bold "New" badge)
- 3 cards from yesterday
- 1 card "Under Review" (blue border, "Being reviewed by Admin User" chip)

TOP FILTERS: All | Submitted | Under Review | (count per status)

Empty state: Green checkmark illustration + "All caught up! No pending verifications."

 **API** — GET /api/v1/admin/workers?verificationStatus=SUBMITTED

PAGE 14 Worker Verification Review · Worker Management

Generate the Worker Verification Review page for VSP Admin. This is a critical page.

LAYOUT: Two-panel split screen.

LEFT PANEL (45%): Worker Profile Summary

- Worker avatar (large, 80px) + name + headline
- Trade badges + experience years
- Bio (full text, scrollable)
- Service area map preview (simple static map with pin)
- Services list (bullets)
- Stats: portfolio items count, certifications count

RIGHT PANEL (55%): Document Viewer

- Tab bar: "Document 1" | "Document 2" | "Document 3"
- Document display area (large, bordered):
Show a placeholder document viewer — PDF-like frame with toolbar:

```
Zoom in/out | Rotate | Download | Fullscreen
- Document type label: "National ID" / "Trade Certificate" / "Proof of Address"
- File info: size + uploaded date
```

DECISION PANEL (below both panels, full width):

```
- Left: Notes textarea "Verification notes (optional for approval, required for rejection)"
- Right: Two large buttons side by side:
  ✓ "Approve Verification" — large green button with CheckCircle icon
  ✗ "Reject Verification" — large red button with XCircle icon
- MFA field below buttons: "Enter MFA code to confirm this action"
```

Show in Approved state with green success overlay as second variant.

 **API** — GET /api/v1/admin/workers/:workerId/verification-documents POST .../verify POST .../reject-verification

PAGE 15 Featured Workers · Worker Management

Generate the Featured Workers Management page for VSP Admin.

PAGE HEADER: "Featured Workers" + "23 active" badge + "Grant Featured Access" button (gold star icon).

STATS ROW: 3 small stat cards:

- Active Featured: 23 | Expiring This Week: 5 | Total Revenue: GHS 24,500

FILTER BAR: Status (Active/Expired/Cancelled) | City | Trade | Search

DATA TABLE:

```
- Worker: avatar + name + trade badges
- City badge
- Subscription: "Active ✓" green / "Expired" red / "Cancelled" gray
- Start Date | End Date (with "Expires in 3 days" amber warning if soon)
- Payment Ref: chip with masked reference
- Actions: Extend | Cancel | View Worker
```

Show 8 rows. Include 2 rows with "Expiring soon" amber warning on end date. Include 1 "Admin-granted" badge (no payment ref) for manually enabled workers.

GRANT FEATURED MODAL:

Show modal: Search + select worker, end date picker, notes field, "Grant Featured Access" button. Note: "No payment required — admin grant".

 **API** — GET /api/v1/admin/featured-workers PATCH /api/v1/admin/featured-workers/:workerId

SECTION 5

Marketplace Operations — Pages 16–19

PAGE 16 Service Requests List · Marketplace

Generate the Service Requests List admin page for VSP Admin.

PAGE HEADER: "Service Requests" + total count + "Export" button.

FILTER BAR: Status filter | Trade | City | Date range | Customer search.

DATA TABLE:

- Request title (truncated 40 chars) | Customer avatar+name | Trade badge | City | Status badge | Requested date | Expires date | Assignments count | Actions

STATUS BADGES: Open=blue, Matched=amber, Accepted=purple, In Progress=indigo, Completed=green, Cancelled=red, Expired=gray

ASSIGNMENT COUNT: "3 workers" chip – amber if 0 assignments after 2 hours.

Actions: View Details | View Customer | Cancel Request

Show 10 rows with varied statuses and trades.

Include 2 rows with "Expiring soon" indicator.

QUICK FILTER TABS above table:

All | Open (24) | Matched (18) | Accepted (31) | In Progress (12) | Completed (...)

 **API** — GET /api/v1/admin/service-requests

PAGE 17 Service Request Detail · Marketplace

Generate the Service Request Detail admin page for VSP Admin.

PAGE HEADER: Request title + large status badge + "Back to list" breadcrumb.

TWO COLUMN LAYOUT:

LEFT COLUMN (60%):

- Description card: Full description text + items list (bulleted: label, qty, note)
- Location card: map placeholder + "East Legon, Accra" + coordinates
- Status Timeline (immutable history):
Vertical timeline – each step: dot + status badge + actor + timestamp
OPEN → MATCHED → ACCEPTED → IN_PROGRESS → COMPLETED
Use coloured dots: green=positive, amber=neutral, red=cancellation

RIGHT COLUMN (40%):

- Customer card: avatar + name + email + phone + "View Profile" link
- Trade badge + Preferred worker (if set)
- Scheduled: date/time chip
- Expires: date/time (red if past)
- Assignments panel:
List of assigned workers – avatar + name + assignment status badge + responded time
Status: Accepted=green, Declined=red, Pending=amber
- Linked Booking card (if exists): booking ID + status + "View Booking →"

- Linked Conversation: "View Chat →" button

Admin action (if OPEN/MATCHED): "Force Cancel" red button at bottom.

 **API** — GET /api/v1/admin/service-requests/:requestId

PAGE 18 Bookings List · Marketplace

Generate the Bookings List admin page for VSP Admin.

PAGE HEADER: "Bookings" + count + "Export" button.

FILTER BAR: Status | Date range (from/to) | City | Worker search | Customer search.

DATA TABLE:

- Booking ID (short hash) | Customer avatar+name | Worker avatar+name | Trade badge | Scheduled date+time | Duration | Status badge | Completed date (if done) | Has Review (star icon) | Actions

STATUS BADGES: Pending=gray, Confirmed=blue, In Progress=indigo, Completed=green, Cancelled=red, Rescheduled=amber

DURATION: "3 hrs" calculated from scheduled_start to scheduled_end.

Actions: View Details | View Request | Contact Parties

Show 10 rows with varied statuses.

QUICK FILTER TABS: All | Confirmed | In Progress | Completed | Cancelled | Rescheduled

Add a subtle revenue indicator per completed booking row (greyed amount).

 **API** — GET /api/v1/admin/bookings

PAGE 19 Booking Detail · Marketplace

Generate the Booking Detail admin page for VSP Admin.

HERO: Booking status badge (large) + scheduled window chip + booking ID.

TWO PERSON CARDS side by side:

- Customer card: avatar + name + email + "View Profile" button
- Worker card: avatar + name + trade badge + rating + "View Profile" button
- Connecting arrow between them

TABS: Details | Reschedule History | Cancellation | Review | Fees

DETAILS TAB:

- Scheduled: start and end times with duration
- Location: address + map placeholder
- Service request link: "View Request →"
- Booking notes (if any)

RESCHEDULE HISTORY TAB:

Timeline of reschedule requests: who requested, old times, new times, response.
Status: Accepted (green) / Declined (red) / Pending (amber).

REVIEW TAB:

Review card: reviewer + rating stars + dimension scores (quality/communication/punctuality/value) as progress bars + review body text.

"No review yet" empty state if none.

FEES TAB:

Payment intent card: amount + currency + status + provider ref.

Platform fees breakdown: fee type + amount rows.

Admin action: "Cancel Booking" red button (only for PENDING/CONFIRMED).

 **API** — GET /api/v1/admin/bookings/:bookingId

SECTION 6

Moderation System — Pages 20–24

PAGE 20 Reports Queue · Moderation

Generate the Reports Queue page for VSP Admin.

PAGE HEADER: "Reports Queue" + red badge "34 open" + sort by: Severity / Date.

SEVERITY FILTER TABS: All | Critical (3) | High (8) | Medium (15) | Low (8)

ENTITY TYPE FILTER PILLS: All | Post | Comment | Review | Message | Worker | User

REPORT CARDS (list, not table):

Each report is a card with:

- Left border colour: red=critical, orange=high, amber=medium, gray=low
- Top row: severity badge + entity type badge + "Reported X hours ago"
- Reporter: "Reported by @username (avatar)" small row
- Reason: Bold reason text snippet
- Entity preview: short excerpt of the reported content (italic, gray)
- Bottom: "View Content →" link + "Open Case" button + "Dismiss" ghost button

Show 8 report cards. Include critical/high/medium/low examples.

Empty state: Shield with checkmark + "No open reports. Platform is clean."

 **API** — GET /api/v1/admin/reports?status=OPEN&severity=

PAGE 21 Moderation Cases List · Moderation

Generate the Moderation Cases List for VSP Admin.

PAGE HEADER: "Moderation Cases" + "47 total" + "New Case" button.

FILTER BAR: Status tabs: All | Open (18) | In Review (12) | Actioned (9) | Closed (8)

Filter: Assigned to me toggle | Date range | Search

DATA TABLE:

- Case ID (short) | Report snippet (italic, gray) | Assigned to (avatar+name or "Unassigned")
- Status badge | Last action | Created date | Actions

STATUS BADGES: Open=blue, In Review=amber, Actioned=green, Dismissed=gray, Closed=slate

ASSIGNED TO: If unassigned show "Assign →" link in blue.

Actions: View Case | Assign to me | Close

Show 8 rows.

UNASSIGNED highlight: rows with no assignee have subtle amber-50 background.

 **API** — GET /api/v1/admin/moderation-cases

PAGE 22 Moderation Case Detail · Moderation

Generate the Moderation Case Detail page for VSP Admin.

PAGE: Full page with breadcrumb "Moderation Cases / Case #MC-2847".

TOP BAND: Case status badge (large) + Report summary chip + Assigned to avatar/name + "Assign to me" button (if not assigned to current admin).

TWO COLUMN:

LEFT (60%) — Evidence & Content:

- Linked Report card: reporter info + reason + severity + full entity content (show the actual post/comment/review inline with full text)
- Content preview: styled box showing reported content, author, timestamp
- Related entity links: "View Post", "View Profile", "View Booking" as chips

RIGHT (40%) — Case Management:

- Assignee section: current assignee card + change button
- Status control: status select dropdown + update button
- Actions history timeline:
 - Each action: admin avatar + action type badge + entity + notes + timestamp
 - Action types: CONTENT_REMOVED (red), USER_WARNED (amber), CASE_DISMISSED (gray), ESCALATED_TO_ADMIN (purple)
- ADD ACTION panel at bottom of right column:
 - Action type select | Entity type + ID (pre-filled) | Notes textarea | Submit button

Show a realistic case: reported post + 2 actions already taken.

 **API** — GET /api/v1/admin/moderation-cases/:caseId POST .../actions

PAGE 23 Moderation Action Panel · Moderation

Generate a standalone Moderation Action Panel as a Slide-over (Sheet) component.

This appears as a right-side sheet drawer, 480px wide.

SHEET HEADER: "Take Action" + case ID + X close button.

FORM:

1. Action Type (required) — Select with icons:
 -  Content Removed — remove the reported content from platform
 -  User Warned — send warning notification to user
 -  Worker Suspended — suspend worker account
 -  Case Dismissed — no action required, dismiss
 -  Escalate to Admin — requires admin review
 -  Account Reviewed — reviewed, no violation found
2. Entity (pre-filled from case, editable):
 - Entity Type select + Entity ID input
3. Notes (required when actioning, optional for dismiss):
 - "Internal notes — visible to admin team only"
 - Textarea, 2000 char max with counter
4. Action-specific options:
 - If USER_WARNED: checkbox "Send email notification to user"
 - If WORKER_SUSPENDED: checkbox "Notify worker" + "Duration" select

FOOTER:

- "Cancel" ghost button
- "Submit Action" primary button (disabled until required fields filled)
- Submit turns to loading spinner + "Processing..."

Show in an active state with "Content Removed" selected.

 **API** — POST /api/v1/admin/moderation-cases/:caseId/actions

PAGE 24 Reported Content Viewer · Moderation

Generate the Reported Content Viewer page for VSP Admin.

This renders different content types. Show all 4 variants:

VARIANT 1 — Post:

- Post card: author avatar + name + timestamp + full post body text
 - + media grid (3 placeholder images)
 - + engagement: "124 likes · 18 comments · 5 saves"
 - + red "REPORTED" banner across the card top

VARIANT 2 — Comment:

- Parent post title as context header
- Comment bubble: author + text + timestamp
 - + "Reply to: [parent comment]" if threaded

VARIANT 3 — Review:

- Review card: reviewer + stars (2/5) + body text
 - + Dimension scores as small bars
 - + Booking context chip

VARIANT 4 — Message:

- "⚠ Private conversation — admin access only" amber banner
- Message bubble in chat style: sender name + message text + timestamp
- Conversation context: participants listed

BELOW EACH VARIANT — Action Bar:

- ✓ "Content is Fine — Dismiss Report" (green outline)
-  "Remove Content" (red) — triggers action panel
-  "Escalate" (amber)

Report metadata sidebar: severity, reporter, reason, created date.

 **API** — GET /api/v1/admin/content/:entityType/:entityId GET /api/v1/admin/reports/:reportId

SECTION 7

Support System — Pages 25–29

PAGE 25 Support Tickets List · Support

```
Generate the Support Tickets List for VSP Admin.

PAGE HEADER: "Support Tickets" + "112 total" + badge "7 unassigned" in amber.

FILTER BAR: Search | Status | Priority | "Assigned to me" toggle.

PRIORITY TABS: All | Urgent (2) | High (12) | Medium (45) | Low (53)

DATA TABLE:
- Subject (bold) | Opener (avatar+name + small "Worker" or "Customer" badge) |
  Priority badge | Status badge | Assigned agent (avatar or "Unassigned") |
  Created | Updated | Actions

PRIORITY BADGES: Urgent=red, High=orange, Medium=amber, Low=gray
STATUS BADGES: Open=blue, Assigned=indigo, Waiting User=amber,
Waiting Internal=purple, Resolved=green, Closed=gray

UNASSIGNED: amber background on rows with no assignee.

Actions: View Ticket | Assign | Update Status | Close

Show 8 rows. Sort: priority DESC + updated_at DESC.

URGENT tickets have a pulsing red left border.
```

 **API** — GET /api/v1/admin/support-tickets?status=&priority=

PAGE 26 Support Ticket Detail · Support

```
Generate the Support Ticket Detail page for VSP Admin.

LAYOUT: Two column — left (65%) message thread, right (35%) metadata sidebar.

LEFT — MESSAGE THREAD:
- Ticket header: subject (bold, 20px) + priority badge + status badge
- Messages in chat-style alternating layout:
  Customer messages: left-aligned, gray bubble
  Agent replies: right-aligned, blue bubble
  Internal notes: centered, yellow background, "🔒 Internal Note" label
- Each message: avatar + name + role badge + timestamp
- Read receipt: small "Seen" text under last message
- Scroll to bottom indicator

RIGHT — METADATA SIDEBAR:
- Ticket info: ID, status select (inline editable), priority badge
- Opener card: avatar + name + type badge (Customer/Worker) + email
- Assignee: avatar + name + "Reassign" link
- Created / Updated timestamps
- Related entity: if booking/request linked show a mini card with link
- Tags/labels (if any)
```

```
REPLY BOX (bottom of left column):  
- Toggle: "Public Reply" (blue) / "Internal Note" (amber)  
- Textarea: "Type your reply..."  
- Bottom row: format buttons + "Send Reply" blue button  
  
Show a realistic 4-message thread.
```

 **API** — GET /api/v1/support/tickets/:ticketId POST ../messages

PAGE 27 Ticket Reply · Support

```
Generate a focused Ticket Reply interface for VSP Admin.  
  
Show the reply composition area as an expanded full-panel view.  
  
HEADER: Replying to ticket "#892 – Question about cancellation" + status chip.  
  
REPLY TYPE TOGGLE (tabs style):  
- "Public Reply" tab – customer will see this  
- "Internal Note" tab – team only, yellow background when active  
  
EDITOR (when Public Reply):  
- Rich toolbar: Bold | Italic | List | Link | – (divider) | Templates dropdown  
- Templates dropdown: Quick responses – "Cancellation Policy", "Refund Process",  
  "Booking Rescheduling", "Account Issues"  
- Large textarea (min 120px)  
- Character counter: "0 / 5000"  
  
EDITOR (when Internal Note):  
- Yellow-tinted background  
- "🔒 Only visible to admin team" header  
- Plain textarea (no rich editor)  
  
FOOTER: Cancel | "Send Reply" button (blue, full-width-ish)  
  
Show Public Reply state active with a sample draft reply.  
  
Also show the post-send success state: green check + "Reply sent" toast.
```

 **API** — POST /api/v1/support/tickets/:ticketId/messages

PAGE 28 Assign Ticket · Support

```
Generate an Assign Ticket modal for VSP Admin.  
  
DIALOG: 520px wide modal, title "Assign Ticket to Agent".  
  
TICKET SUMMARY at top of modal (compact):  
"#892 – Question about cancellation · Medium priority · Opened 2h ago"  
  
AGENT SEARCH:  
- Search input: "Search agents by name..."  
- Filtered list of support agents:  
  Each agent: avatar + name + "SUPPORT" role badge + "X active tickets" count  
  + online status dot (green/gray)  
  Currently selected agent highlighted in blue
```

```
Show 5 agents:
- Sarah K. · 3 active tickets · Online
- James A. · 7 active tickets · Online
- Fatima M. · 1 active ticket · Away
- David O. · 0 active tickets · Offline
- Kwame B. · 5 active tickets · Online

OPTIONAL MESSAGE: "Add a note to the assignee" textarea (optional).

FOOTER: Cancel | "Assign Ticket" blue button.

Show the modal over a blurred background with James A. selected.
```

 **API** — PATCH /api/v1/admin/support-tickets/:ticketId/assign

PAGE 29 Update Ticket Status · Support

```
Generate a status update control for Support Tickets in VSP Admin.

Show this as an inline control within the Ticket Detail sidebar (not a full modal).

STATUS CONTROL CARD (in sidebar):
- Label: "Ticket Status"
- Current status: large badge (e.g. "ASSIGNED" in indigo)
- Below: "Update status" section
- Status select with icons:
  🗉 Open | 👤 Assigned | ⌚ Waiting for User | 🔄 Waiting Internal |
  ✓ Resolved | 🔒 Closed
- Optional note: "Add a status note (optional)"
- "Update Status" button (outline, full width)

TRANSITION RULES (show as helper text):
- Resolved → "Auto-closes in 7 days if no reply"
- Closed → "This cannot be undone"

Also show the status update as a timeline event added to the message thread:
"[System] Status changed from Assigned → Resolved by Admin User at 14:32"
(centered, small, gray italic text between messages)

Show Resolved state with the 7-day auto-close countdown.
```

 **API** — PATCH /api/v1/admin/support-tickets/:ticketId/status

SECTION 8

Analytics — Pages 30–33

PAGE 30 Analytics Overview · Analytics

Generate the Analytics Overview page for VSP Admin.

HEADER ROW: "Analytics" title + date range picker "Last 30 days ▼".
Date range presets: 7d | 30d | 90d | 12m | Custom

KPI CARDS ROW (6 cards):

- Total Registrations: 3,241 | +18% vs prev period
- Active Workers: 4,231 | +8%
- Total Bookings: 1,847 | +23%
- Completed Bookings: 1,634 | 88.5% completion rate
- Platform Revenue: GHS 48,200 | +31%
- Avg Platform Rating: 4.6 ★ | +0.2

CHART ROW 1 (2 charts):

- Left: "User Registrations" area chart – 30-day trend, blue fill
- Right: "Bookings" grouped bar chart – Completed (green) vs Cancelled (red)

CHART ROW 2 (2 charts):

- Left: "Revenue" line chart – daily revenue, green line
- Right: "Trade Category Distribution" donut chart:
Electrician 28% | Plumber 22% | Carpenter 18% | Other 32%

BOTTOM: Moderation actions trend small chart + Platform health score.

All charts use recharts, smooth animations, tooltips on hover.
Use consistent colour palette matching design tokens.

 **API** — GET /api/v1/admin/analytics/overview?from=&to=

PAGE 31 Search Analytics · Analytics

Generate the Search Analytics page for VSP Admin.

HEADER: "Search Analytics" + date range picker.

STAT CARDS (4):

- Total Searches: 28,450 | Search-to-View Rate: 34.2%
- Top City: Accra (62%) | Zero Results Rate: 8.3%

CHART ROW (2):

- Left: "Search Volume by Day" – line chart, 30-day
- Right: "Top Trade Categories Searched" – horizontal bar chart:
Electrician 8,230 | Plumber 6,180 | Carpenter 4,920 | Painter 3,100 | ...

TWO COLUMN LOWER:

LEFT – "Top 20 Search Queries" table:

- Rank | Query | Count | Result count | Click rate
- Highlight zero-result queries in red

```
RIGHT — "Worker Impression Leaderboard":
- Rank | Worker avatar+name | Impressions | Profile views | Conversion %
- Top 10 workers by impressions
- Gold/silver/bronze for top 3

BOTTOM: "City-wise Search Distribution" map placeholder
+ colour-coded by search volume.
```

 **API** — GET /api/v1/admin/analytics/search

PAGE 32 Engagement Analytics · Analytics

```
Generate the Engagement Analytics page for VSP Admin.

HEADER: "Engagement Analytics" + date range.

STAT CARDS (4):
- Posts Created: 1,284 | Avg Likes per Post: 24
- Comment Rate: 18% | New Follows: 3,420

CHART ROW 1 (2):
- Left: "Content Creation" stacked bar — Posts (blue) vs Comments (green) per day
- Right: "Engagement Rate" — likes/comments/saves as 3 lines on same chart

CHART ROW 2 (2):
- Left: "Most Engaged Workers" — horizontal bar chart top 10, sorted by
  total engagement (likes + comments on their posts)
- Right: "Moderation Case Rate" — small area chart showing daily cases,
  with a "Platform safety score: 94/100" callout badge

BOTTOM TABLE: "Top Posts by Engagement"
- Post snippet | Author | Trade | Likes | Comments | Saves | Date | Status badge
- Flagged/deleted posts shown with strike-through and red badge

FOLLOWS TREND: Small sparkline showing daily follow counts.
```

 **API** — GET /api/v1/admin/analytics/engagement

PAGE 33 Marketplace Analytics · Analytics

```
Generate the Marketplace Analytics page for VSP Admin.

HEADER: "Marketplace Analytics" + date range picker.

HEADLINE FUNNEL (horizontal funnel chart):
Requests Created (2,841) → Matched (2,406) → Accepted (1,980) →
In Progress (1,834) → Completed (1,634)
Each stage shows count + % conversion from previous. Colour gradient blue-green.
Drop-off percentages shown in red below each arrow.

STAT CARDS ROW (4):
- Avg Time to Accept: 1.8 hours
- Cancellation Rate: 11.5% (Customer 6.8%, Worker 4.7%)
- Avg Booking Duration: 2.4 hours
- Response Rate P75: 94%

CHART ROW (2):
- Left: "Top Trades by Completed Bookings" — donut chart
```

```
Electrician 28% | Plumber 22% | Carpenter 18% | Painter 12% | Other 20%  
- Right: "Cancellation Rate Trend" – line chart, split by customer vs worker
```

BOTTOM (2):

- Left: "Response Rate Distribution" – bell curve / histogram
Showing P25=78%, P50=91%, P75=97%
- Right: "Avg Time to Accept by Trade" – horizontal bar chart
Show top 8 trades with hours

Colour palette: blues and greens for positive metrics, reds for cancellations.

 **API** — GET /api/v1/admin/analytics/marketplace

SECTION 9

Configuration & Governance — Pages 34–37

PAGE 34 Configurations List · Configuration

Generate the Configurations List page for VSP Admin.

PAGE HEADER: "System Configurations" + "20 configs" + last-updated timestamp.

GROUPED SECTIONS (accordion or section dividers):

Business Logic

- review_window_hours · 168 · "Hours after booking to leave review"
- response_rate_window_hours · 48
- service_request_expiry_hours · 48
- booking_conflict_buffer_minutes · 30
- booking_auto_complete_hours · 24

Search & Ranking

- search_ranking_weights · { text: 0.40, rating: 0.20, featured: 0.15... }
- default_search_radius_km · 10
- max_search_radius_km · 100

Fraud & Safety

- fraud_score_moderation_threshold · 70
- fraud_score_auto_suspend_threshold · 90

Billing

- featured_subscription_price_minor · 1000
- featured_subscription_duration_days · 30

Each config row: key (monospace) + value preview + description + "Edit" button.

JSON values show formatted preview (first 60 chars + "...").

Last updated timestamp + which admin changed it.

IMPACT INDICATOR: ● High impact configs have red warning dot.

API — GET /api/v1/admin/configs

PAGE 35 Config Editor · Configuration

Generate the Configuration Editor page for VSP Admin.

LAYOUT: Single-column centered, max-width 720px.

BREADCRUMB: "Configurations / search_ranking_weights"

CONFIG HEADER:

- Key: search_ranking_weights (monospace, bold)
- Description: "Typesense search ranking weight model. Changes affect all search results within 60 seconds."
- Impact badge: "● HIGH IMPACT – affects all search results"
- Last updated: "Updated 5 days ago by Admin David M."

CURRENT VALUE CARD:

```

- Label: "Current value"
- JSON formatted display (syntax highlighted):
  { "text_relevance": 0.40, "avg_rating": 0.20, "is_featured": 0.15,
    "profile_complete": 0.10, "response_rate": 0.10, "distance": 0.05 }

EDIT SECTION:
- Label: "New value" + "Must be valid JSON" hint
- JSON editor textarea (monospace, line numbers)
- Real-time JSON validation: green check OR red error message
- "Validate" button

MFA SECTION (amber box):
"🔒 MFA verification required for this change"
6-digit OTP input

FOOTER:
"Cancel" + "Save Configuration" button (disabled until valid JSON + MFA filled)

Show validation error state: red border + "Invalid JSON: unexpected token at line 4".

```

 **API** — PATCH /api/v1/admin/configs/:configKey

PAGE 36 Feature Flags · Configuration

```

Generate the Feature Flags management page for VSP Admin.

PAGE HEADER: "Feature Flags" + "10 flags" + last-updated.

LAYOUT: Card grid (2 columns).

FEATURE FLAG CARD:
- Top row: flag key (monospace bold) + ON/OFF toggle switch
- Status: "Enabled" green text OR "Disabled" gray text
- Description text (1-2 lines)
- Rollout info (if set): "🎯 Rolled out to 25% of users" with progress bar
- Last changed: "Changed 3 days ago by Admin"
- Bottom: "View change log" link

Show 8 flag cards:
- ENABLE_VIDEO_PORTFOLIO — Disabled — "Allow workers to upload video items"
- SEMANTIC_SEARCH_V2 — Disabled — "Enable vector recommendations"
- WORKER_AVAILABILITY — Enabled — "Show availability calendar on profiles"
- SOCIAL_FEED — Enabled — "Enable social activity feed"
- FEATURED_WORKERS — Enabled — "Featured worker placement on search"
- CHAT_ATTACHMENTS — Enabled — "Allow file attachments in chat"
- BOOKING_RESCHEDULE — Enabled — "Allow booking reschedule requests"
- REVIEW_DIMENSIONS — Enabled — "Show structured dimension scores"

TOGGLE CONFIRMATION MODAL:
Show modal: "Disable SOCIAL_FEED?" + impact warning + Confirm/Cancel.

```

 **API** — GET /api/v1/admin/feature-flags PATCH /api/v1/admin/feature-flags/:flagKey

PAGE 37 Cities Settings · Configuration

```

Generate the Cities Coverage Settings page for VSP Admin.

PAGE HEADER: "Cities & Coverage" + "3 active cities" + "Add City" button.

```

CITY CARDS (large cards, 1 per row or 2-column grid):

Each city card:

- Left: Country flag emoji + City name (bold, 20px) + Country code + timezone
- Stats row: Currency | Default search radius | Worker count badge | User count badge
- Status: large toggle switch "City Active" / "City Disabled" with green/red indicator
- Footer: Edit button | View Workers | Last updated timestamp

Show 3 cities:

🇬🇦 Accra — Ghana (GH) — GHS — 10km radius — 2,841 workers — ACTIVE (toggle on)
🇳🇮 Lagos — Nigeria (NG) — NGN — 15km radius — 1,204 workers — ACTIVE
🇰🇪 Nairobi — Kenya (KE) — KES — 10km radius — 634 workers — ACTIVE

ADD CITY MODAL:

Form: City slug (auto-generate from name) | City name | Country select |
Currency select | Timezone select | Default search radius (1-100km slider) |
"Enable city immediately" toggle | Save button.

Show the modal open.

 **API** — GET /api/v1/admin/cities POST .../cities PATCH .../cities/:cityId

SECTION 10

Roles & Permissions — Pages 38–41

PAGE 38 Roles List · Roles & Permissions

Generate the Admin Roles List page for VSP Admin.

PAGE HEADER: "Roles & Permissions" + "Super Admin only" badge.

ROLE CARDS (2x2 grid):

-  **SUPER ADMIN card:**
 - Purple gradient header
 - "Full platform access including role assignment"
 - Permissions: "41/41 – Full Access" with FULL_ACCESS chip
 - Assigned users: 1 user avatar
 - "View Permissions" button
-  **ADMIN card:**
 - Blue header
 - "Platform operations – verification, config, analytics"
 - Permissions: "32/41 permissions"
 - Assigned: 3 avatars + "+2 more"
 - "Edit Permissions" button
-  **MODERATOR card:**
 - Amber header
 - "Trust and safety – content moderation"
 - Permissions: "11/41 permissions"
 - Assigned: 2 avatars
-  **SUPPORT card:**
 - Green header
 - "Customer service – ticket management"
 - Permissions: "5/41 permissions"
 - Assigned: 4 avatars

Footer: "Permission keys are immutable. Role assignments require Super Admin."

 **API** — GET /api/v1/admin/roles

PAGE 39 Permissions Catalog · Roles & Permissions

Generate the Permissions Catalog page for VSP Admin.

PAGE HEADER: "Permissions Catalog" + "41 total permissions" + read-only badge.

DOMAIN GROUPS (accordion sections):

Each group has a colour-coded header and lists permission keys as chips.

-  **Users (3):** USER_VIEW · USER_SUSPEND · USER_REACTIVATE
-  **Workers (4):** WORKER_VIEW · WORKER_VERIFY · WORKER_REJECT_VERIFICATION · FEATURED_WORKER_MANAGE
-  **Content (3):** POST_DELETE · COMMENT_DELETE · REVIEW_DELETE

```

🛡️ Trust & Safety (6): REPORT_VIEW · MODERATION_CASE_ASSIGN · MODERATION_CASE_ACTION ·
FRAUD_SIGNAL_VIEW · FRAUD_SIGNAL_ACTION · CONTENT_VIEW
🧑 Support (3): SUPPORT_TICKET_VIEW · SUPPORT_TICKET_ASSIGN · SUPPORT_TICKET_RESPOND
📊 Analytics (5): ANALYTICS_VIEW_OVERVIEW · ANALYTICS_VIEW_SEARCH ·
ANALYTICS_VIEW_ENGAGEMENT · ANALYTICS_VIEW_MARKETPLACE · AUDIT_LOG_VIEW
⚙️ Configuration (7): CONFIG_VIEW · CONFIG_UPDATE · FEATURE_FLAG_VIEW ·
FEATURE_FLAG_UPDATE · CITY_VIEW · CITY_CREATE · CITY_UPDATE
📺 Marketplace (3): SERVICE_REQUEST_VIEW · BOOKING_VIEW · NOTIFICATION_BROADCAST
🔒 Access Control (6): ROLE_VIEW · PERMISSION_VIEW · ROLE_PERMISSION_UPDATE ·
ADMIN_ROLE_ASSIGN · ADMIN_ROLE_REMOVE · FULL_ACCESS
🔧 System (2): SYSTEM_HEALTH_VIEW · (FULL_ACCESS covers all)

```

Each permission chip: key (monospace) + hover tooltip with description.
Chips colour-coded by domain.

MATRIX TOGGLE: "Show role assignment matrix" button expands a full 41x4 grid.

 **API** — GET /api/v1/admin/permissions

PAGE 40 Role Permission Editor · Roles & Permissions

Generate the Role Permission Editor for VSP Admin.

HEADER: "Edit Permissions — MODERATOR role" + current permission count badge.

LAYOUT: Two columns.

LEFT (55%) — Permission Catalog with checkboxes:

Grouped by domain (same groups as page 39).

Each permission: checkbox + key (monospace) + description (small, gray).

Group header: domain name + "X/Y selected" counter.

Permissions assigned to this role: checkboxes checked (blue).

FULL_ACCESS is greyed out with "Super Admin only" tooltip.

RIGHT (45%) — Role Summary:

- Role card: MODERATOR + description

- "Currently assigned: 11 permissions"

- CHANGES PREVIEW section:

- + Adding (green): FRAUD_SIGNAL_VIEW, CONTENT_VIEW

- Removing (red): ANALYTICS_VIEW_ENGAGEMENT

- = Unchanged: 9 permissions

MFA CONFIRMATION section (amber box):

"Enter MFA code to save changes"

6-digit OTP boxes

FOOTER:

"Cancel (discard changes)" + "Save Permission Changes" (disabled until MFA filled)

Show the diff state with 2 additions and 1 removal highlighted.

 **API** — PATCH /api/v1/admin/roles/:roleId/permissions

PAGE 41 Admin Role Assignment · Roles & Permissions

Generate the Admin Role Assignment page for VSP Admin.

PAGE HEADER: "Admin Role Assignments" + "8 admin users" + "Assign Role" button.

```
SEARCH BAR: "Search users by name or email to assign admin role..."

CURRENT ADMIN USERS TABLE:
- Avatar+Name+Email | Current Roles (badges) | Assigned by | Assigned date | Actions

ROLES BADGES: SUPER_ADMIN=purple, ADMIN=blue, MODERATOR=amber, SUPPORT=green

Actions per row:
- "Add role" button (if user has fewer than max roles)
- Per-role "Revoke" X button next to each badge

Show 6 users with various role combinations.

ASSIGN ROLE MODAL:
- Search input: find user by name/email
- User result card: avatar + name + email + current roles
- Role selector: 4 role cards (MODERATOR / SUPPORT / ADMIN / SUPER_ADMIN)
  with descriptions – click to select
- MFA field: "Enter MFA code to confirm role assignment"
- "Assign Role" button

REVOKE CONFIRMATION:
Show inline confirmation: "Remove MODERATOR from John D.? This will immediately
revoke their moderation access." – Yes, Remove | Cancel

Audit trail note: "All changes are logged to the Audit Log."
```

 **API** — POST /api/v1/admin/users/:userId/roles DELETE ../roles/:roleId

SECTION 11

Audit & Risk — Pages 42–43

PAGE 42 Audit Logs · Audit & Risk

Generate the Audit Logs page for VSP Admin.

PAGE HEADER: "Audit Logs" + "Append-only · Cannot be modified" read-only badge.
"Export CSV" button.

FILTER BAR:

- Action search: "Filter by action type..."
- Entity type: All / User / Worker / Config / Feature Flag / Role / City
- Admin user: All / [admin user picker]
- Date range: from/to date pickers
- Reset filters

DATA TABLE:

- Timestamp (precise, monospace) | Admin (avatar+name+role badge) | Action badge (colour-coded) | Entity type chip | Entity ID (clickable link) | Expand row (for diff)

ACTION BADGES (colours):

- WORKER_VERIFIED (green) | USER_SUSPENDED (red) | CONFIG_UPDATED (amber) | FEATURE_FLAG_UPDATED (blue) | ADMIN_ROLE_ASSIGNED (purple) | POST_DELETED (orange)

EXPANDED ROW (click to expand):

Before/after diff panel:

- Left "Before": old values in gray
- Right "After": new values highlighted in green/red

Show 10 rows. Mix of action types.

PAGINATION + "Showing 1-20 of 4,521 log entries"

 **API** — GET /api/v1/admin/audit-logs?action=&entityType=&adminUserId=&from=&to=

PAGE 43 Fraud & Risk Signals · Audit & Risk

Generate the Fraud & Risk Signals page for VSP Admin.

PAGE HEADER: "Fraud & Risk Signals" + "12 open signals" + red badge.

RISK SCORE LEGEND (horizontal, compact):

 Critical ≥90 ·  High 70-89 ·  Medium 40-69 ·  Low <40

FILTER BAR:

- Status: Open | Reviewed | Dismissed | Actioned
- Signal Type: All / Review Pattern / Rapid Account / Token Reuse / Malware / etc.
- Min Score slider: 0 – 100
- User search

DATA TABLE:

- User (avatar+name+email) | Signal Key (monospace badge) | Score (colour-coded number, bold) | Accumulated (if multiple signals: "Total: 148 across 3 signals") |

Entity (type+ID chip) | Status badge | Created | Actions

SCORE COLOURS: ≥90=red bg, 70-89=orange bg, 40-69=amber bg, <40=gray

Actions dropdown:

- Review (mark as reviewed, no action)
- Dismiss (false positive)
- Open Moderation Case

Show 8 rows. Include one row with accumulated score "Total: 152" in red.

ROW EXPANSION: Click row to see signal detail + user activity summary.

 **API** — GET /api/v1/admin/fraud-signals PATCH /api/v1/admin/fraud-signals/:signalId

SECTION 12

System Monitoring — Page 44

PAGE 44 System Health · System

```
Generate the System Health Dashboard for VSP Admin.

PAGE HEADER: "System Health" + overall status badge "All Systems Operational" (green) |
"Degraded" (amber) | "Outage" (red). Last checked: "2 seconds ago" with refresh button.

SERVICE STATUS GRID (3 columns, 6 cards):

● Database — "PostgreSQL on Supabase"
  Latency: 4ms | Connections: 23/100 | Status: Operational

● Redis Cache — "Redis 7"
  Memory: 340MB / 2GB (17%) | Hit Rate: 94% | Status: Operational

● Typesense Search — "26.0"
  Workers indexed: 4,231 | Index lag: 2.1s | Status: Operational

QUEUE HEALTH SECTION (table):
Queue Name | Waiting | Active | Completed | Failed | Status
notifications | 12 | 3 | 48,291 | 2 | ✓ Healthy
search | 0 | 1 | 12,430 | 0 | ✓ Healthy
analytics | 0 | 0 | 8,210 | 0 | ✓ Healthy
media | 4 | 2 | 3,421 | 1 | ✓ Healthy
billing | 0 | 0 | 892 | 0 | ✓ Healthy
media-video | 1 | 1 | 234 | 0 | ✓ Healthy

API METRICS SECTION:
- P95 Latency: 187ms | Requests/min: 342 | Error Rate: 0.08%
- Rolling 1-hour chart: requests per minute over time
- WebSocket connections: 1,284 active

RECENT JOB RUNS table (last 10):
Job name | Status badge | Started | Duration | Records processed

Show 1 service as amber "Degraded" state as a variant.
```

SECTION 13

New Pages — 45–48

PAGE 45 Admin MFA Setup · New Pages

Generate the Admin MFA Setup page for VSP Admin.

LAYOUT: Centered card, max 600px, full-height dark background.

STEP INDICATOR at top: 3 steps – Choose Method · Verify · Backup Codes

STEP 1 – Choose Method:

- Heading: "Secure your admin account with two-factor authentication"
- Subtext: "Required for performing sensitive admin actions"
- Two large method cards:

 Authenticator App (Recommended)
Works with Google Authenticator, Authy, 1Password
"More secure · Works offline" badges
→ Select button

 SMS / Text Message
"Sent to your verified phone number"
→ Select button

STEP 2 – TOTP Setup:

- Large QR code placeholder (square, with scan frame)
- "Can't scan? Enter this key manually:" + monospace key
- 6 OTP input digit boxes
- "Verify Code" button

STEP 3 – Backup Codes:

- "Save these codes somewhere safe" amber banner
- 8 backup codes in a 2x4 monospace grid
- "Copy all codes" + "Download as .txt" buttons
- Checkbox: "I have saved these codes" (required before continuing)
- "Complete Setup" green button

 **API** — POST /api/v1/auth/mfa/setup POST /api/v1/auth/mfa/verify-setup

PAGE 46 Broadcast Notification · New Pages

Generate the Broadcast Notification page for VSP Admin.

PAGE HEADER: "Broadcast Notification" + "MFA Required" lock badge.

LAYOUT: Two column – left (60%) compose form, right (40%) preview + history.

LEFT – COMPOSE FORM:

AUDIENCE SECTION:

- Target Audience cards (selectable):
 -  All Users – 52,847 users
 -  All Workers – 4,231 active workers
 -  City – [city select dropdown]
 -  Trade – [trade select dropdown]

- Estimated recipients: "→ 52,847 recipients" (updates on selection)

MESSAGE SECTION:

- Title input: max 100 chars + counter
- Body textarea: max 500 chars + counter + remaining chars

CHANNEL:

- Checkbox group: ☒ In-App ☒ Push Notification ☐ Email

SCHEDULE (optional toggle):

- "Send now" (default) OR "Schedule for later" + datetime picker

MFA: "Enter MFA code to send" + 6 OTP boxes

RIGHT — PREVIEW:

- Phone mockup showing how push notification will appear
- In-app notification preview card

BROADCAST HISTORY (below preview):

Table: Date | Audience | Recipients | Channel | Status
Show 3 past broadcasts.

"Send Broadcast" large blue button at bottom.

 **API** — POST /api/v1/admin/notifications/broadcast

PAGE 47 Worker Subscription Management · New Pages

Generate the Worker Subscription Management page for VSP Admin.

ACCESS: From Worker Detail page → Subscription tab.

LAYOUT: Single column within the Worker Detail tabs context.

CURRENT SUBSCRIPTION CARD:

- Large header: "Featured Subscription" + status badge (ACTIVE/EXPIRED/NONE)
- If ACTIVE:
 - Start date → End date with progress bar (X days remaining)
 - "Expiring in 8 days" amber warning if soon
 - Source: "Worker purchased" OR "Admin granted" badge
 - Payment reference: masked chip (if purchased)
- If NONE: "No active subscription" gray card + "Grant Featured Access" button

ADMIN ACTIONS (card):

- "Manually Enable Featured" button (gold star)
 - Opens mini form: End date picker + Notes (required) + Submit
- "Extend Subscription" button (if active)
 - Opens: New end date picker + Notes + Submit
- "Cancel Subscription" red button (if active)
 - Confirmation: "This removes featured placement immediately"

SUBSCRIPTION HISTORY TABLE:

Status | Start Date | End Date | Source | Amount | Invoice
Show 3 rows.

INVOICE HISTORY TABLE:

Invoice date | Amount | Currency | Status badge | Provider ref
Show 3 invoices.

All admin actions require notes. All logged to audit_logs.

 **API** — GET /api/v1/admin/workers/:workerId/subscription PATCH ...subscription

PAGE 48 Reported Content Viewer (Standalone) · New Pages

Generate the full-page Reported Content Viewer for VSP Admin.

HEADER: Breadcrumb "Reports Queue / Report #R-8821 / Content Viewer"
+ back arrow + "Report #R-8821 · High severity" chip.

TWO COLUMN:

LEFT (65%) – Content Display:

- "Content Type: POST" badge + author info row
- THE CONTENT (styled to look like the actual app):
Post card with blue-tinted border:
Avatar + "Bob Williams" + timestamp
Post text: "Just completed a full residential rewiring job..."
3 attached images (placeholder grid)
Engagement: "124 likes · 18 comments · 5 saves"

- "REPORTED CONTENT" red banner overlaid (semi-transparent)

- MODERATION HISTORY section:

Timeline of any previous actions on this content
(or "No previous moderation actions" empty state)

RIGHT (35%) – Report Details:

- Report card: severity badge + reporter info + reason + date
- Reporter: "@alice_j · Reported 4 hours ago"
- Reason: "Suspicious spam-like content with fake job showcase"
- Linked moderation case chip (if exists)
- ACTION BUTTONS (stacked):
 - ✓ "Content is Fine – Dismiss" (green outline)
 -  "Remove This Content" (red) → triggers action panel slide-over
 -  "Escalate to Senior Admin" (amber)
 -  "Open Moderation Case" (blue outline)

- RELATED LINKS:

"View Worker Profile →"
"View Booking Context →"
"View All Reports by Reporter →"

 **API** — GET /api/v1/admin/content/:entityType/:entityId GET /api/v1/admin/reports/:reportId

SECTION 14

Follow-up Refinements & v0 Tips

Refinement Prompts & Tips

Universal Follow-up Prompts

After any page generation, use these follow-up prompts to refine:

```
// Make it more compact
"Reduce the row height in the table. Use text-sm throughout.
Make the filter bar a single line instead of wrapping."

// Add empty states
"Add empty states for: no data found, no search results, loading skeleton."
"Show a skeleton loader version of this page while data is loading."

// Add error states
"Add error state handling: API error banner, retry button, and field-level errors."

// Improve mobile responsiveness
"Make this page work on tablet (768px). Collapse the sidebar to icon-only at tablet."

// Dark mode
"Add a dark mode variant of this page. Keep the sidebar unchanged (already dark)."

// Add transitions
"Add Framer Motion transitions: table rows fade in, cards slide up on load."
```

Quick Consistency Checks

Check	What to verify
Sidebar nav active state	The correct nav item should be highlighted blue on each page
Badge colours	Consistent across all pages — use the StatusBadge component defined in Step 1
Action button placement	Primary actions top-right, dangerous actions are red outline not filled
Table column ordering	Checkbox → Name/Identity → Key attributes → Status → Date → Actions
Empty states	Every list/table needs a proper empty state component
Loading states	All data-fetching pages need skeleton loader variants

Iterating Across Multiple Sessions

 **Tip** — At the start of each new v0 session, paste: "Using the VSP Admin design system: dark sidebar #0F172A, primary blue #1D4ED8, shadcn/ui components, React+TypeScript+Tailwind — generate..." — this 1-line context helps maintain consistency even across separate chats.

 **Tip** — Export each page from v0, place it in a shared components/admin/pages/ folder, and build a local Storybook to see all pages together. Inconsistencies become obvious when viewed side by side.
